

URGENT APPEAL FOR SOL KASIMER
FOR A LIVE KIDNEY TRANSPLANT DONOR
BLOOD TYPE O+

Our friend Sol Kasimer needs a new kidney. Sol is in kidney failure as his one remaining kidney is currently operating at only nine percent efficiency (GFR). Without a transplant he will require dialysis and face even more serious health risks. Unfortunately, two potential donors who came forward did not work out. We're reaching out on his behalf once again to find prospective and compatible live kidney donors. Sol has put the health and wellbeing of others first for his entire life. As the CEO of the YMCA of Montreal and YMCA Canada as well as a leader in other organizations in the charitable sector, he has been a champion for the kind of community building that changes lives for the better. He needs his community now to demonstrate its collective strength by supporting him, his wife Rachel and his family through this challenging time.

Here's what you can do to help.

1. Read about [The Ajmera Transplant Centre](#). It is part of the world-class University Health Network in Toronto, and home to Canada's largest kidney transplant program.
2. Read more about this life-saving medical procedure [here](#) and reflect on this opportunity to be a living kidney donor.
3. Share this appeal and program information with your networks.
